

LITTLE BEAVER®
EARTH DRILLS & AUGERS

SNAP-ON AUGERS

- Three auger types (standard, carbide, and heavy-duty)
- Variety of diameters (1.5" to 16") and lengths (36" & 42")
- Complete selection of replacement points and blades

Augers, Extensions, Points and Blades

COMPLETE LINE OF ONE-MAN EARTH DRILLS, AUGERS AND MINI-TRENCHERS

Little Beaver makes a wide variety of augers to handle virtually any drilling need.

From small 1.5" diameter augers used for soil sampling, to large 16" nursery augers, we've got the auger type and size for your application. All augers feature a convenient spring-loaded snap button that secures the auger to the drill head, eliminating the need for pins or bolts.

Available in both 36" and 42" lengths, Little Beaver snap-on augers feature heavy-duty flighting, replaceable/reversible blades, and a secure snap button connection. Thirteen diameter sizes from 1.5" to 16" means there's an auger size that's just right for your application.

STANDARD SNAP-ON AUGERS

Auger length	Depth of hole
36"	30"
42"	36"

Diameter Sizes (Standard Auger): 1.5" 2" 3" 4" 5" 6" 7" 8" 9" 10" 12" 14" 16"

AUGERS, EXTENSIONS, POINTS AND BLADES

HEAVY-DUTY SNAP-ON AUGERS

When drilling in rocky soils, heavy-duty augers are recommended. In addition to different flighting, these augers are equipped with a heavy-duty tooth and side cutting blades.

These augers operate best at slower RPM's than standard augers and are recommended for 20:1 or 13:1 gear ratio transmissions.

All heavy-duty augers come complete with a standard bolt-on point and dirt tooth blades. Points can be replaced with a standard point for ordinary drilling or a carbide tip point for abrasive soils. Six different blade types are available to meet a specific drilling condition. All blades are held in place with rubber locks.

Item	Application	Special Instructions	
1	Standard point	Ordinary digging	
2	Carbide tip point	Abrasive soils	
3	Standard dirt blade	Ordinary digging	All pockets
4	Hardfaced blade	??????	All pockets, HF side up
5	Carbide tip blade	Hard pan, frozen soils	All pockets
6	Carbide insert blade	Abrasive soil and impact	All pockets
7	Chisel point blade	Loose rock, compacted soil	Inside pockets only, rib side up
8	Chisel point w/ carbide blade	Compacted rock, abrasive soil, no impact	Inside pockets only, rib side up
9	Rubber lock	Secure blades to auger	

Diameter Sizes (Heavy-Duty Auger): 6" 7" 8" 9" 10" 12" 14"

LITTLE BEAVER
EARTH DRILLS & AUGERS

SNAP-ON AUGER EXTENSIONS

When deeper holes are required, add a Little Beaver snap-on extension. Available in both full flighted and tube versions, these extensions are equipped with a spring-loaded snap button for fast, yet secure connections.

Full Flighted Extensions

Available in a variety of diameters of 3" through 14" and in lengths of 18" or 36", full flighted extensions are used with the corresponding size auger to quickly pull cutting spoils to the surface, leaving a clean hole.

**Diameter
Sizes:**

3" 4" 5" 6" 7" 8" 9" 10" 12" 14"

Tube Extensions

Tube extensions can be used with any size auger. While some hole clean-out is required, the lightweight, snap-on design, and universal use make them an invaluable accessory when deeper hole drilling is required.

Lengths: 18" and 36" lengths (fit any size auger)

LITTLE BEAVER[®]
EARTH DRILLS & AUGERS

SMALL DIAMETER AUGERS & EXTENSIONS

Used widely in the geophysical field for soil sampling, Little Beaver small diameter Hex augers consist of a replaceable hex point, auger body, and a hex adaptor that connects to the power head by a snap button connection. The point and adaptor are connected to the auger by means of a stainless steel locking pin. Both hex augers and extensions are available in 36", 42", 48" and 60" lengths.

Hex augers consist of a replaceable hex point, auger body, and a hex adaptor that connects to the power head by a snap button connection. The point and adaptor are connected to the auger by means of a stainless steel locking pin. Both hex augers and extensions are available in 36", 42", 48" and 60" lengths.

D-SERIES AUGERS

Designed for use with the Big Beaver Drill Rig. All D-series augers feature solid top construction and connect with a pin and a clip for a secure connection when drilling at deeper depths. Available with a standard point and blade, carbide blade or heavy duty type teeth. Both D-series augers and extensions are available in 36" or 48" lengths, and a wide range of diameters from 4" to 18". Unlike the snap-on augers, the 12" D-series is a full 12" diameter.
